

**La Vie's Commitment
To Directly Assisting with Community Water Needs**

We, La Vie Co., Ltd., recognize that the human rights in access to safe water and the importance of ensuring an adequate amount of safe water for our communities. On the basis of that recognition, in order to contribute to assuring the safe water access of local communities where we have existing plants and businesses, we have installed stations to provide free drinking water to the local community. Through these, local communities can access to our free drinking water stations daily.

At Hung Yen factory, the free water supply station has been operating since January, 2015 to September, 2018, we have provided free water through this station more than 71.300 liters of finished water to local community.

At Long An factory, the free water supply station was in operation from March, 2015 to September, 2018 we have provided free water through this station nearly 60.000 liters of finished water to the local community.

Our free water stations has been operating daily and recognized, appreciated by local communities.

I commit to continue the day-to-day running of the free water stations to ensure that the local community has more access to safe drinking water.
